## WORK EXPERIENCE

### Luminous Labs

Mirpur DOHS, Dhaka, Bangladesh

Software Engineer

20/03/2021

- I created a Subscription product module using paypal subscription payment method for a CMS website which is a drag and drop CMS with live edit integrated system.
- I developed a live messaging system by using Socket server and Core PHP language. And the socket server is created by using laravel Framework.
- I worked on a product module where I maintain and manage more than 10,000 products for a CMS.
- I did RSS integration using XML data for a blog module. Here users can show blog posts from another website which provide rss xml from their website.

## Project

### Droptienda ([link](#))

- This is a drag & drop with live edit system CMS integrated using laravel.

### E-commerce Website

- This is an Ecommerce website with full functionality of purchase , payment, shipping, delivering and developing by using Laravel.
